

Brainstorming & Idea Prioritization

Project Name: Script-Controlled ACL – Restrict Record Access Based on Field Value

Team ID: SWTID-2026-5919

Step 1: Brainstorm and Idea Listing

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	V. Abitha	Restrict student records based on branch using ServiceNow ACL	Security	1
2	T.Archanadevi	Create a custom Institution Details table for student records	Database / Table	1
3	T. Akalya	Create different roles such as bb1, bb2, bb3 and bb4 for access control	User & Role Management	1
4	M. Kishor Banu	Use a script-controlled Read ACL to allow access only to authorized users	Security	1
5	T. Atchaya	Control Create, Write and Delete operations using separate ACLs	Access Control	1
6	V. Abitha	Provide full access to Admin users while restricting other users	Security	1
7	T. Archanadevi	Use the Branch field such as EEE, ECE and CSE to control record access	Data Security	1
8	T. Akalya	Test access by impersonating users with different roles	Testing	1
9	M. Kishor Banul	Prevent unauthorized users from viewing or modifying sensitive student records	Data Protection	1
10	T. Atchaya	Implement role-based access for viewing, creating, editing and deleting records	Access Control	1

The project document specifies the creation of an **Institution Details** table with fields such as Student Roll Number, Student Name, Faculty Name, Branch, Email, Phone Number and Description.

Step 2: Idea Prioritization

Group No.	Final Idea	Feasibility	Importance	Priority Selected
1	Branch-based record access using Script-Controlled ACL	High	High	Yes
2	Create an Institution Details custom table	High	High	Yes
3	Create user roles bb1, bb2, bb3 and bb4	High	High	Yes
4	Implement a Script-Controlled Read ACL	High	High	Yes
5	Implement Create, Write and Delete ACLs	High	High	Yes

Final Selected Idea

Script-Controlled ACL – Restrict Record Access Based on Field Value

Idea Description:

The project will implement a Script-Controlled Access Control List (ACL) in ServiceNow to restrict access to student records based on the **Branch** field and user roles. Users with appropriate roles will be allowed to perform specific operations such as **Read, Create, Write and Delete**, while unauthorized users will be denied access.

The project document states that the main purpose is to provide **controlled and secure access to ServiceNow records**.

Final Priority

- **Feasibility:** High
- **Importance:** High
- **Priority Selected:** Yes
