

Code-Layout, Readability and Reusability

Team ID: SWTID-2026-5919

Project Name: Script-Controlled ACL – Restrict Record Access Based on Field Value

Code Layout Checklist

S.No	Code Quality Parameter	Description	Followed	Remarks
1	Consistent Indentation	Uniform spacing and indentation are used throughout the ACL scripts.	Yes	ACL scripts follow consistent formatting.
2	Proper File Structure	ServiceNow ACL configurations and project components are logically organized.	Yes	Roles, ACLs and table configurations are separated logically.
3	Meaningful Variable Names	Variables clearly represent their purpose.	Yes	Variables such as gs, current and role names are used appropriately.
4	Function / Method Names	Functions are descriptively named where applicable.	Yes	ACL script logic is organized clearly.
5	Code Comments	Comments explain the purpose of the ACL logic.	Yes	Comments are included to describe access-control conditions.
6	Modular Design	Access-control logic is divided into separate ACL components.	Yes	Read, Create, Write and Delete ACLs are configured separately.
7	No Redundant Code	Duplicate or unnecessary access-control logic is avoided.	Yes	Each ACL has a specific access-control purpose.
8	Error Handling	Invalid or unauthorized access is handled by denying access.	Yes	Users without the required permission are denied access.

The checklist follows the template's eight code-quality parameters, including indentation, file structure, meaningful names, comments, modular design, redundant-code removal, and error handling.

Reusable Components / Modules

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
1	Read ACL Script	Server-Side JavaScript	Institution Details table	High
2	Create ACL	ServiceNow ACL	Institution Details table	High
3	Write ACL	ServiceNow ACL	Institution Details table	High
4	Delete ACL	ServiceNow ACL	Institution Details table	High
5	Role-Based Access Configuration	ServiceNow Role Management	Multiple users	High

Overall Code Quality Assessment

Aspect	Rating (1–5)	Comments
Code Layout & Structure	5	ACLs and role configurations are organized according to their access operations.
Readability	5	Access-control logic is simple and clearly structured.
Reusability	4	ACL and role configurations can be reused for similar ServiceNow tables and access requirements.
Documentation / Comments	4	Comments and project documentation explain the purpose of the access-control logic.
Overall Score	5	The project follows a clear and maintainable access-control structure.
