

No. of Functional Features Included in the Solution

Team ID: SWTID-2026-5919

Project Name: Script-Controlled ACL – Restrict Record Access Based on Field Value

Functional Features Overview

S.No	Feature Name	Feature Description	Module / Component	Status	Marks	Contribution
1	User Creation	Create users for testing access permissions.	User Management	Done		Provides users for access testing.
2	Role Creation	Create roles bb1, bb2, bb3 and bb4.	Role Management	Done		Defines different access permissions.
3	Custom Table	Create the Institution Details custom table.	Database / Table	Done		Stores student and institution information.
4	Branch Field	Add Branch field with EEE, ECE and CSE choices.	Institution Details	Done		Supports branch-based access control.
5	Read Access Control	Control record viewing using ACL and role-based logic.	Read ACL	Done		Prevents unauthorized record viewing.
6	Create Access Control	Allow record creation only for authorized users.	Create ACL	Done		Controls creation permissions.
7	Write Access Control	Allow record modification only for authorized users.	Write ACL	Done		Prevents unauthorized modifications.
8	Delete Access Control	Allow record deletion only for authorized users.	Delete ACL	Done		Protects records from unauthorized deletion.

Feature Summary

Metric	Count / Value
--------	---------------

Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	8
Additional / Nice-to-Have Features	0
Features Tested & Verified	8

Feature Category Breakdown

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	ServiceNow forms and lists, Institution Details records
2	Backend / Logic	4	Read, Create, Write and Delete ACL logic
3	Database / Storage	1	Institution Details custom table
4	API / Integration	0	Not applicable
5	Security / Authentication	3	User roles, role-based access, Branch-based access control

The template specifically includes the categories **User Interface, Backend / Logic, Database / Storage, API / Integration, and Security / Authentication** for the feature breakdown.
